

Switch to developer mode

To work as a developer you need to kill the process which automatically relaunch Reeti apps if they die, and relaunch Reeti Urbi server in a console mode.

With Reeti V2 :

1. Get out of Reeti interface (Ubuntu icon in the home page top bar)
2. Run script "killrestarter" (on Desktop)
3. When you want to restart reeti server use the link "Urbi" (on Desktop)
4. To execute urbi commands, open a console with "Urbi Console" (on Desktop)
5. If you want to restart reeti interface :
 - a. kill Reeti interface : use ALT + F4
 - b. use script "Launcher" (on Desktop)

With Reeti V1 :

1. Get out of Reeti interface (Configuration --> Ubuntu icon)
2. Run script killrestarter.sh (on desktop)
3. When you want to restart reeti server use script "reetiDev.sh" (on Desktop)
4. You can execute urbi commands in reetiDev console
5. If you want to restart reeti interface :
 - a. kill Reeti interface : use ALT + F4
 - b. use script "Launcher" (on Desktop)
